

So far by studying all the projects that are supported by Fonds Soziokultur, I have realised that they all have one main characteristic - the aim to make a positive change in the society. In this comic you will learn about three diverse projects supported by Fonds Soziokultur and also their wish for change in the future.

The boat people projekt is a theatre making project,
run by two thoughtful women.

The boat people projekt is about connection,
love and trust.

They make theater
peices in collaboration
with people from
evrywhere.

boat
people
projekt

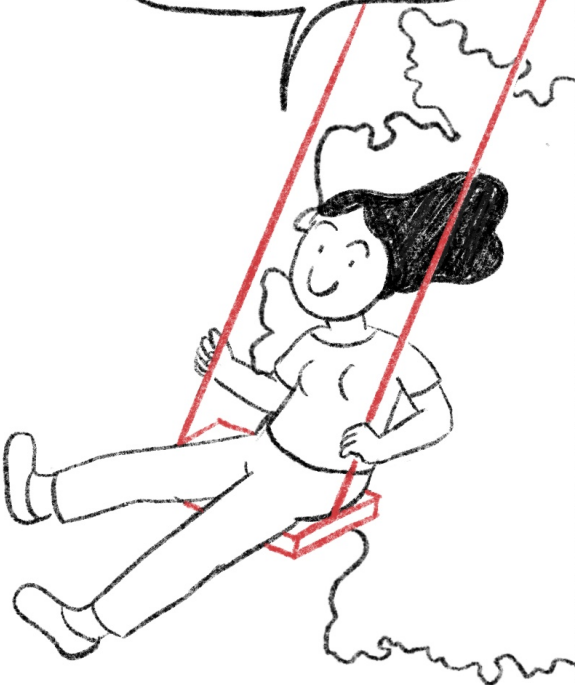

The framework of the boat people project is hard to define but this is a part of who they want to be.

They swing between political and non-political projects.

local and international

amateur and professional

Grutte Oxis is a Latin American film festival that is run by 10 people who all have a connection to the region.

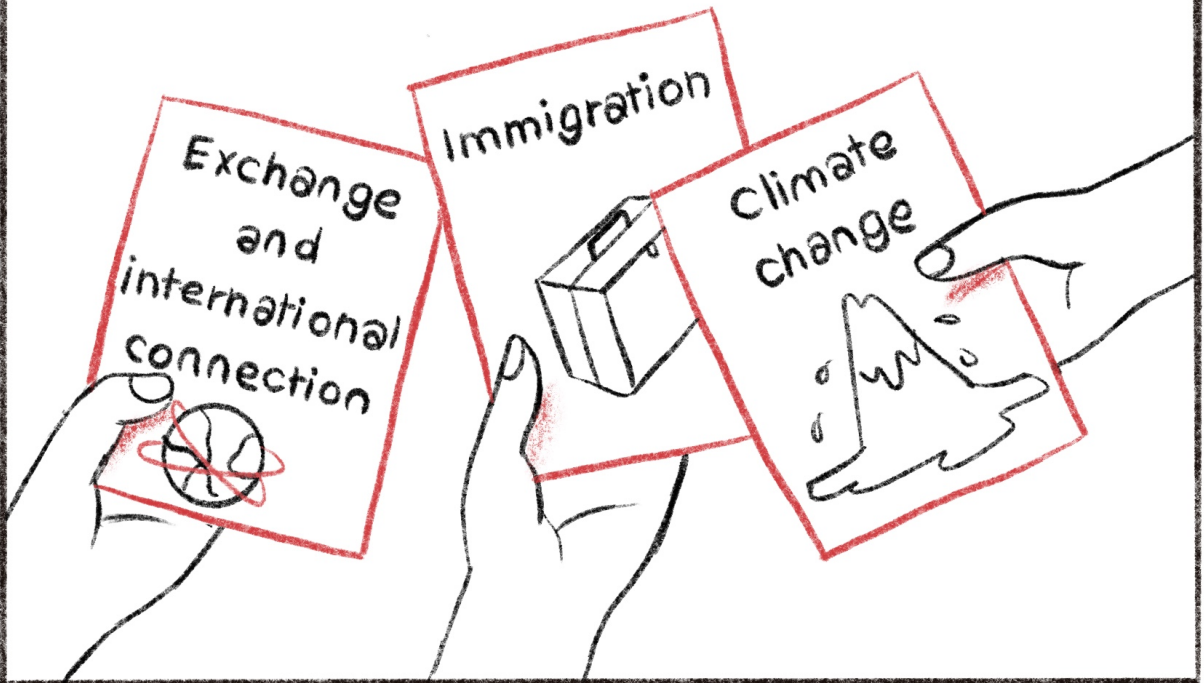

I love how they describe the effect that Fonds Soziokultur has had on their work:

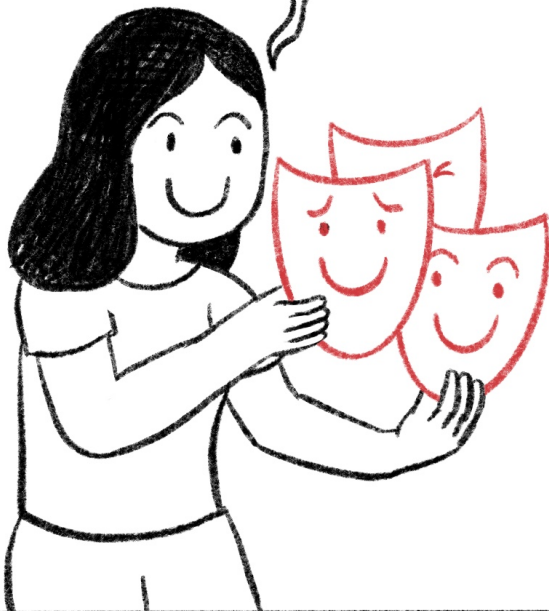

"A hand that gently pushes us forward, they know what we do is based on ambition and spontaneity and they respect our way of working which has focus on process rather than result"

The boot people projekt is responsive towards the external world so they see their future projects to be more about:

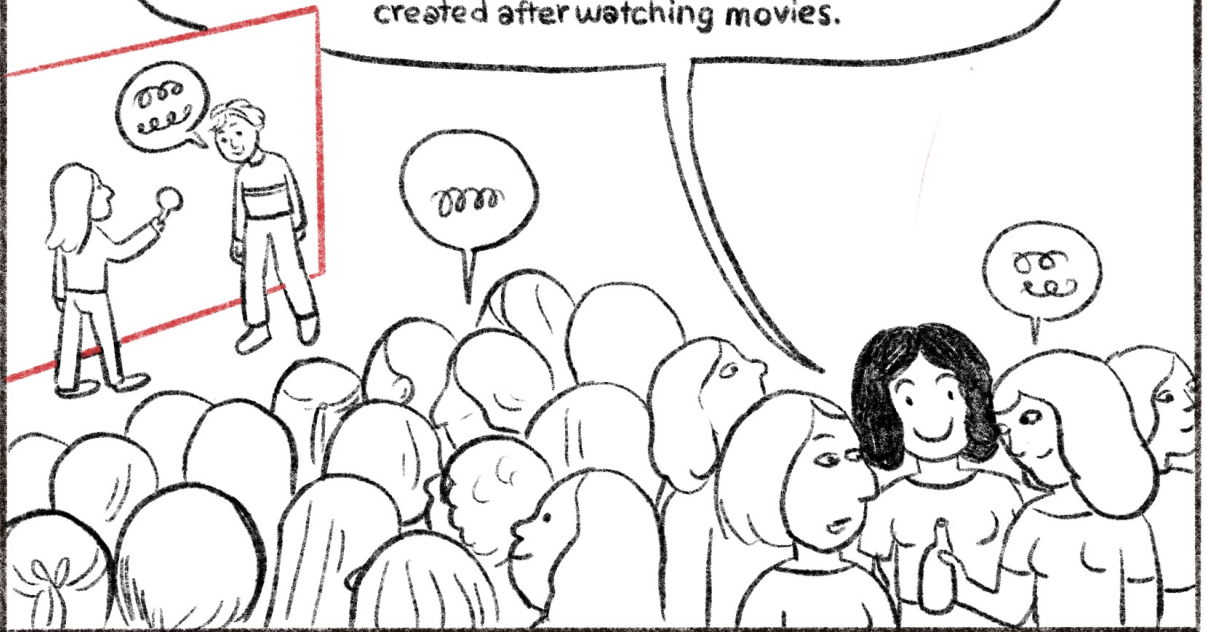

They are open to all genres of film which focuses on less heard stories.

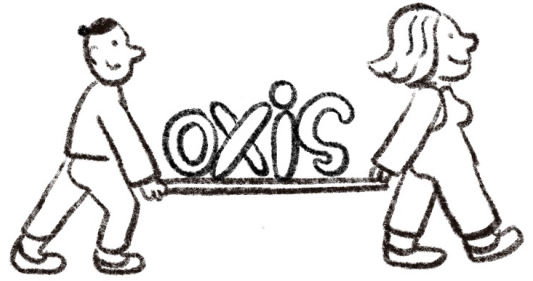

By supporting alternative Latin American filmmakers, they empower small communities and minorities

Gruppo axis as well as creating a cosy place for its audience to watch movies, wants to take away the barriers between culture, politic and society and this is often possible by the discussions and the debates that get created after watching movies.

Fonds Soziokultur is important for Gruppe Oxis because it has helped them to be more devoted and professional

With the found they can also pay the person who does their bucratical jobs which we all know is not fun at all

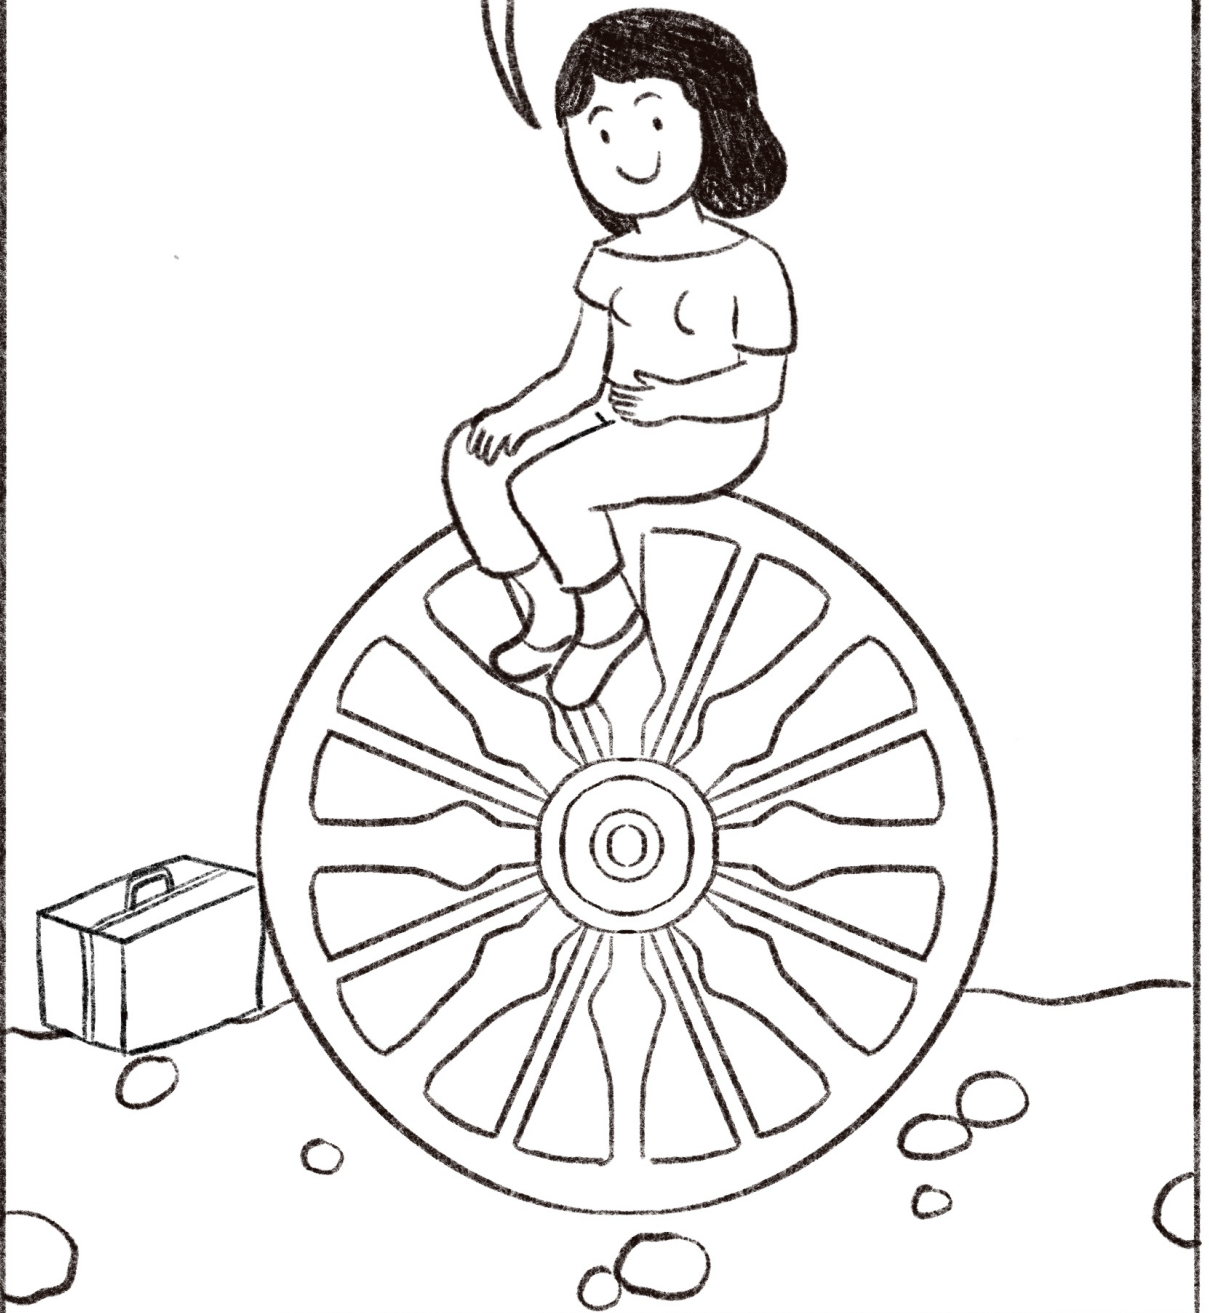

Gruppe Oxis wish they could have more funding in the future. They say if they could change something that would be having a decent salary for all their staff so they could guarantee their festival for the future.

So true, thanks a lot for this wish

The Roma Center is an organisation founded in 2006 in order to empower the community of Roma people in Germany. Their work is meaningful and absolutely necessary.

What they do is very clear. they are fighting against racism, and educating people regarding that

They want all children regardless of their background to have the same possibilities and chances in society

It's very important

For better sharing the stories of Roma community they organise workshops such as writing, journalism, and theater for them.

They have regular networking gatherings in order to meet like-minded people.
I like this very much, because instead of putting their energy into people who ignore the importance of their work they want to collaborate with those who support and encourage them to go forward

I agree

EVERYDAY
IS
A ROMA DAY

These networkings are very important for them and its found sociokulture that helps them to run these meetings.
For the future they wish to expand these network internationally and go beyond the borders of germany.
